

The pie chart displays the distribution of various drugs used in clinical trials. The segments are labeled with the drug names: Sorafenib, 5-fluorouracil, ABT-888, ABT-888 and temozolomide, Adriamycin/Cytosine, Alvesin, Cisplatin, Everolimus, Gemcitabine, and HEC-1, LY22820, Mitomycin C, Regorafenib, SORAFENIB SOM 230, Sorafenib (Nexavar), Sorafenib, Sunitinib, Tamoxifen, doxorubicin, adriamycin, everolimus, oxaliplatin, temsirolimus, Temozolomide, cisplatin, tabine, and ib. The segments are arranged in a circle, with Sorafenib being the largest segment at the bottom.

A pie chart illustrating the distribution of 20 drugs used in the study. The chart is divided into 20 segments, each representing a drug. The segments are color-coded and labeled with the drug name. The largest segment is SORAFENIB, followed by GEMCITABINE, DOXORUBICIN, and TEMOZOLOMIDE. Other drugs include CISPLATIN, EVEROLIMUS, VELIPARIB, TEMSIROLIMUS, TAMOXIFEN, SUNITINIB, REGORAFENIB, PASIREOTIDE, OXALIPLATIN, MITOMYCIN, LY228820, FLUOROURACIL, CYCLOPHOSPHAMIDE, ALVESIN, and ABT-888.

Drug	Approximate Percentage
SORAFENIB	35%
GEMCITABINE	15%
DOXORUBICIN	10%
TEMOZOLOMIDE	8%
CISPLATIN	5%
EVEROLIMUS	4%
VELIPARIB	3%
TEMSIROLIMUS	2%
TAMOXIFEN	2%
SUNITINIB	2%
REGORAFENIB	2%
PASIREOTIDE	2%
OXALIPLATIN	2%
MITOMYCIN	2%
LY228820	2%
FLUOROURACIL	2%
CYCLOPHOSPHAMIDE	2%
ALVESIN	2%
ABT-888	2%
