

[illegible]

A pie chart illustrating the distribution of 18 different drugs used in a study. The chart is divided into 18 segments of varying sizes, each representing a different drug. The largest segment is Fluorouracil (pink), followed by Oxaliplatin (white), Leucovorin (light blue), Bevacizumab (yellow), Irinotecan (purple), Capecitabine (cyan), Cetuximab (red), and a large number of smaller segments for other drugs including Floxuridine, Pegfilgrastim, FOLFIRI, Mitomycin, Etoposide, Docetaxel, Paclitaxel, Gemtuzumab, and Amifostine.

Drug	Approximate Percentage
FLUOROURACIL	35%
OXALIPLATIN	25%
LEUCOVORIN	20%
BEVACIZUMAB	10%
IRINOTECAN	8%
CAPECITABINE	7%
CETUXIMAB	5%
FLOXURIDINE	2%
PEGFILGRASTIM	2%
FOLFIRI	2%
MITOMYCIN	2%
ETOPOSIDE	2%
DOCETAXEL	2%
PACLITAXEL	2%
GEMTUZUMAB	2%
AMIFOSTINE	2%
